

PHILANTHROPIC PARTNERSHIP OPPORTUNITY

Funding the Next Generation of Physician-Scientists

A sustainable model for medical trainee research fellowships that grows with success—not donor fatigue.

"With every move, we make a difference."

The Physician-Scientist Pipeline is Collapsing

NIH K-awards are the gateway to independent research careers. But the system is failing the very people it was designed to support.

WHO GETS LEFT BEHIND

- First-generation physicians without family wealth
- Trainees at less-resourced institutions
- Those without existing lab connections
- Researchers pursuing novel directions

60-80% of K-award applications are rejected annually

\$0 preliminary data funding for most trainees

60-80 clinical hours/week leave no time for research

"hidden curriculum" barriers for outsiders

Why Traditional Philanthropy Falls Short

Fellowship programs dependent on donations face structural limitations.

Cyclical Availability

Donor enthusiasm waxes and wanes. Foundation priorities shift. Endowment returns fluctuate.

Competitive Allocation

Multiple programs compete for the same limited philanthropic dollars.

Restricted Purposes

Donors often specify narrow uses that may not align with trainee needs.

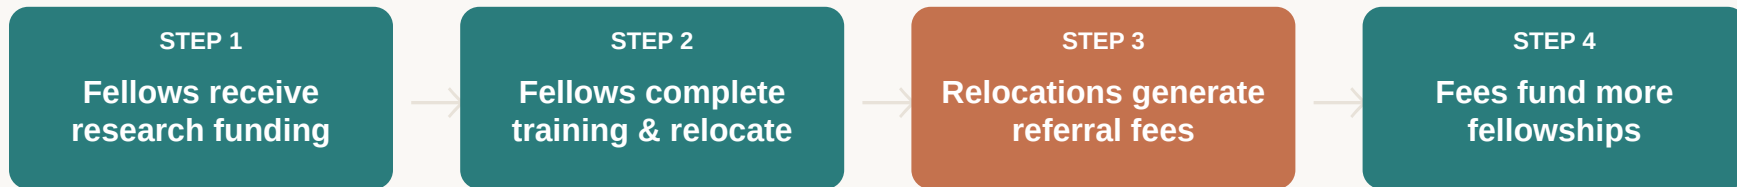

Founder Dependence

Programs built around individual donors collapse when relationships end.

REACH is different: our revenue grows with program success, not donor fatigue.

A Self-Sustaining Revenue Model

Relocation Referral Fees

25% referral fee on home purchases through our Keller Williams network. ~\$3,000 per transaction.

Sponsor Partnerships

Service providers pay \$200/month for marketing access to high-earning-potential physicians.

The REACH Fellowship

Structured K-award preparation with funding, framework, and support.

\$11,500 Direct Funding

For research supplies, participant compensation, statistical support, travel

12-Question K-Award Framework

Structured guidance addressing every NIH requirement

Weekly Check-ins & Support

Identify barriers early, connect with resources

Relocation Support

Vetted real estate agents during career transitions

Program Details

Award Amount **\$11,500 to Emory**

Duration **12 months**

Eligible **MD/PhD, Residents, Fellows**

Target K-Awards **K01, K08, K23**

Pilot Location **Emory University**

Goal **K-award in 12-18 months**

Your Investment, Their Future

Every dollar directly enables the next generation of physician-scientists.

\$15,000

Fund One Fellowship

Support a single trainee through their K-award preparation year

\$50,000

Fund the Prototype Year

3 fellows + operations for the full proof-of-concept phase

\$150,000

Fund the Pilot Year

10 fellows + 501(c)(3) formation + Georgia expansion

\$2M+

Named Fellowship Endowment

Permanent legacy supporting fellows in perpetuity

What We Need Now

IMMEDIATE (2025)

- \$35,000 to launch prototype
- Board member candidates

NEAR-TERM (2026)

- \$75,000 for pilot year
- Foundation grant applications
- Institutional partnerships

GROWTH (2027+)

- Named fellowship donors
- Endowment contributions

REACH Partnerships

**"With every move,
we make a difference."**

Join us in building a sustainable future for physician-scientist training.
